GOVCARE EHR

CKD AI CLINICAL DECISION SUPPORT REPORT

Clinical decision support only - clinician review required

PATIENT & REPORT DETAILS

Patient	SYNTHETIC SOFTWARE DEMONSTRATION - NOT A CLINICAL RECORD
Patient number	SYNTHETIC-OUTLOOK-QA
DOB	Not recorded
Sex	Not recorded
Assessment ID	a563c3f9-e43f-4df3-90f1-051cb54a8dad
Assessment time	2026-10-15T04:48:10.046790893Z
Hospital	Not recorded
Department	Not recorded
Clinician / operator	Not recorded
Model	SOFTWARE-QA

CKD RISK SUMMARY

Predicted CKD risk	Risk category	AI confidence
32.0%	**MODERATE**	**80.0%**

CKD CLASSIFICATION & CLINICAL CODING

Suggested CKD classification	Unable to classify
G category	Not assigned
Suggested ICD code	Not assigned
Clinical description	Not assigned
Terminology system	Not assigned
Basis	Reviewed eGFR unavailable
Coding status	AI-assisted suggestion
Confirmation	Clinician confirmation required

A single eGFR result does not independently establish chronic kidney disease or chronicity. N18.6 (ESRD) is not inferred from eGFR alone.

○ G1	○ G2	○ G3a	○ G3b	○ G4	○ G5

RENAL & ASSOCIATED FINDINGS

Parameter	Result	Unit	Source

CKD Related Clinical Intelligence Summary

Source evidence, monitoring status and next clinical actions

No related-risk snapshot available. No values or risk results have been inferred.

Anemia Monitoring

Risk status: Data required

Available evidence: coverage not established

Missing information: dated clinical source evidence required. Open the patient workspace to review inputs.

Clinician notes: No notes stored for this module snapshot.

Hyperkalemia Risk Monitoring

Risk status: Data required

Available evidence: coverage not established

Missing information: dated clinical source evidence required. Open the patient workspace to review inputs.

Clinician notes: No notes stored for this module snapshot.

Dialysis Effectiveness Monitoring

Risk status: Data required

URR: Not calculated

Available evidence: coverage not established

Missing information: dated clinical source evidence required. Open the patient workspace to review inputs.

Clinician notes: No notes stored for this module snapshot.

Renal Function Progression

Risk status: Data required

Available evidence: coverage not established

Missing information: dated clinical source evidence required. Open the patient workspace to review inputs.

Clinician notes: No notes stored for this module snapshot.

CKD Cardiovascular Monitoring

Risk status: Surveillance recommended | Risk not estimated

Available evidence: coverage not established

Missing information: dated clinical source evidence required. Open the patient workspace to review inputs.

Clinician notes: Review / record findings in the existing patient clinical record.

Why this result?

Interpret recorded creatinine, eGFR, potassium and hemoglobin with their actual source dates. Arrows and trends require repeated dated observations. Missing values do not imply low risk. Clinical monitoring uses transparent existing measurement rules. Research forecasts remain separately gated. Detailed source evidence, model information, limitations and stored clinician reviews follow.

Data completeness is not diagnostic certainty, forecast eligibility or disease probability. No inference is run during export.

CKD-RELATED CLINICAL RISKS & PREDICTIVE INTELLIGENCE

Sri Lankan Longitudinal Renal & Hemodialysis Data

No six-module snapshot has been stored. Open the authorized renal workspace to capture current evidence. No inference was performed for this export.

Renal Clinical Trajectory **Result not calculated - insufficient longitudinal data.**	**Kidney Failure / G5D** **Result not calculated - insufficient longitudinal data.**	**Hyperkalemia Monitoring** **Result not calculated - insufficient longitudinal data.**
Anemia / Hb Deterioration **Result not calculated - insufficient longitudinal data.**	**Dialysis Adequacy / URR** **Result not calculated - insufficient longitudinal data.**	**Renal Clinical Deterioration** **Result not calculated - insufficient longitudinal data.**

Clinical Decision Support / Research Use. Outputs require clinician interpretation. Research-model outputs are not independently validated diagnoses.

CLINICAL DATA USED FOR ASSESSMENT

Parameter	Result	Unit	Source	Coding

KEY FACTORS IN THIS MODEL OUTPUT

Contribution direction describes this model's prediction, not whether a clinical value is healthy, safe or protective.

Factor	Value	Unit	Direction	Contribution

RECOMMENDED CLINICAL REVIEW

No recommendation was returned by the prediction service.

CLINICIAN REVIEW

Suggested classification	Not assigned
Suggested code	Not assigned
Coding decision	[ ] Confirm [ ] Modify [ ] Reject
Final clinician-selected code	_____
Clinical notes	_____ _____
Reviewed by / date	_____

This output does not diagnose disease or replace professional medical judgement. AI-assisted coding must be reviewed before a confirmed FHIR Condition is created.

FIVE-YEAR CKD OUTLOOK

Future risk, current evidence, and clinical planning

RESEARCH PREVIEW | Local clinical validation: NOT COMPLETED

Assessment: 7e0f36b0-e14e-4908-af9d-9b429796f191 | As of 2026-10-15T04:48:10.036559424Z

Status: AVAILABLE | Review: ACCEPT

WITHIN TWO YEARS	WITHIN FIVE YEARS
9.01%	**30.63%**

Kidney failure requiring dialysis or transplantation within the stated horizon

Published equation estimate of treated kidney failure within two and five years. Clinical events, future laboratory values and survival are not determined by this estimate.

Recorded clinical evidence

Input	Value / unit	Measurement time	Evidence source
Age	65 years	Demographic / clinical confirmation	Patient date of birth
Equation sex variable	MALE	15 Oct 2026 04:48 UTC	Clinician-confirmed equation variable
eGFR	25 mL/min/1.73m2	14 Oct 2026 04:48 UTC	VERIFIED_CLINICAL_OBSERVATION synthetic-egfr
Urine ACR	300 mg/g	14 Oct 2026 04:48 UTC	VERIFIED_CLINICAL_OBSERVATION synthetic-acr

Current recorded stage: G4 | Dialysis context: NOT_ON_MAINTENANCE_HD

Observed kidney history - recorded measurements only

Metric	Measured at	Recorded value
eGFR	19 Oct 2025 04:48 UTC	45 mL/min/1.73m²
eGFR	17 Jan 2026 04:48 UTC	40 mL/min/1.73m²
eGFR	17 Apr 2026 04:48 UTC	35 mL/min/1.73m²
eGFR	16 Jul 2026 04:48 UTC	30 mL/min/1.73m²
eGFR	14 Oct 2026 04:48 UTC	25 mL/min/1.73m²
Urine ACR	14 Oct 2026 04:48 UTC	300 mg/g

Up to six recent measurements per metric are shown. No five-year laboratory values are forecast.

Why this outlook?

Four-variable KFRE | KFRE4-NNA-2016-GOVCARE-1.0 | Published non-North American calibration (2016); not calibrated to this hospital

No individual prediction interval is supplied. Local calibration and competing mortality may affect interpretation; these are not survival probabilities.

Verified clinical context: Synthetic verified clinical context

Clinician review and follow-up plan

Reason: Synthetic operational clinical review
Clinician notes: Software demonstration only; not a clinical subject.
Year 1 - Review verified renal measurements and the individualized follow-up interval
Future milestones are clinician-defined plans, not predicted clinical events.

Limitations and provenance

- Local clinical validation is not completed; this integration is a research preview.
- No five-year eGFR, anemia, potassium, cardiovascular, dialysis adequacy or survival model is installed.
- Two- and five-year risks are separate event estimates, not annual rates or dates of dialysis.
- Current treatment, competing mortality and population calibration require clinician interpretation.
